Detailed Action

This is the first Office Action corresponding to original filing. The application contains 4 claims.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statements, which has been reviewed by the Examiner.

Specification

The disclosure is objected to because of the following informalities: the title is objected to as not been sufficiently descriptive of the invention. The Office does not longer accept single word titles.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

No proper antecedent is found in claim 1, line 4 for “the front side”, line 7 for “the therapeutic device”, and line 9 for “the distal end”.

Further, it seems that claim 2 is a direct translation of the Japanese claims. Please review and provide a claim written in proper idiomatic English.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Schulz (Pat No 5,806,822).

The patent to Schulz discloses a fixed portion (22), a groove (16), a notch (entrance to groove), and a holding hole (14).

Allowable Subject Matter

Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harris (5,005,790) and Shigeki (4,997,692) show other devices of interest.
